

Hepatitis A Vaccine Availability

Hepatitis A vaccine is available through the Vaccines for Children (VFC) Program at an enrolled private provider's office, a local health department (LHD), a Federally Qualified Health Center (FQHC), a Rural Health Center (RHC), or a Migrant Health Center (MHC). Hepatitis A vaccine is also available through the Michigan Adult Vaccine Replacement Program (MI-VRP) at a LHD, a FQHC, or a MHC.

If you are at least 1 year of age and are less than 19 years of age:

And you are:

- Medicaid-eligible, or
- Uninsured, or
- American Indian/Alaska Native, or
- Underinsured

Please ask your VFC provider about getting hepatitis A vaccine.

If you are 19 years of age or older:

And you are:

- Uninsured, or
- Underinsured

And you are:

- A household and/or sexual contact of a hepatitis A virus (HAV) infected person, or
- A man who has sex with other men, or
- A person with an acute or chronic liver disease, or
- An injecting drug user, or a non-injecting methamphetamine user

Please ask your MI-VRP (LHD, FQHC, or MHC) provider about getting hepatitis A vaccine.

If you are an adolescent or an adult regardless of insurance status and are being seen at a Sexually Transmitted Disease Clinic, Teen Health Center, or a Family Planning Clinic that is participating in the Michigan High Risk Hepatitis A & B Program:

And you are:

- A household and/or sexual contact of a hepatitis A or B virus infected person, or
- A person with more than one sex partner in the last six months, or
- A male who has sex with other males, or
- A person seeking evaluation or treatment for a sexually transmitted disease, or
- An injecting-drug user, or a non-injecting methamphetamine user, or
- A person with an acute or chronic liver disease, or
- A person with HIV infection

Please ask about getting hepatitis A vaccine.
