**VIBRIOSIS-NON CHOLERA**

1

- a. Chickenpox cases are reported primarily from schools. Confirmed and probable cases are included. e
- b. Includes "Influenza-Like Illness (ILI)" and lab-confirmed influenza. ILI cases have flu-like symptoms and are reported primarily by schools.
- c. "Meningitis, Bacterial, Other" includes meningitis and bacteremia caused by bacteria OTHER THAN H. influenzae, N. meningitidis, or S. pneumoniae. **Except for Chickenpox, Campylobacter, Cryptosporidiosis, Shiga-Toxin Producing E. Coli, Salmonellosis, Shigellosis & Influenza-Like Illness**, only confirmed cases (as defined by National Surveillance Case Definitions: <http://wwwn.cdc.gov/nndss/script/casedefDefault.aspx>) are included. Reports are considered provisional and subject to updating when more specific information becomes available. d. This data is currently under review, and new enhancements to surveillance system are in place. e Data on report will now include probable and confirmed cases. Previously, only confirmed cases were counted on reports in prior years d surveillance system numbers currently under review post Coronavirus, Covid 19
